

# WESTERN PARKWAY

## Range of Alternatives

-  POTENTIAL STUDY AREA      STREAMS AND RIVERS      POSSIBLE FOCUS AREA FOR ALIGNMENT CONCEPTS
-  GRADE-SEPARATED INTERCHANGE AT FIVE POINTS      SR 1 LAND USE AND TRANSPORTATION STUDY CORRIDORS

### We Need Your Help in Developing a Full Range of Alternatives

As part of the project development process, we will examine a full range of alternatives including improvements to existing roads, roads on new alignment, transit and bicycle/pedestrian opportunities. We have provided additional copies of this map on the tables in the center of the room for you to mark your suggestions for alternatives. This is your opportunity to provide input to help ensure the project meets the needs of your community.

### Previously Identified Alignment Concepts

- ◆ The alignment concepts from the State Route 1 Land Use and Transportation Study.
- ◆ Improvements to the existing Plantations Road/Warrington Road (Route 1D) corridor.

The shaded area shows a potential area to focus the engineering and environmental evaluation for the Western Parkway Project for your review and comments.
